- The 3KM of almost-flat raised plank walks take you to the Bat Observatory (40 minutes to 1 hour).
- Walk another 500m to reach one of the world's largest cave passages, home to more than 3 million Wrinkle Lipped bats.
- A large number of swiftlets also roost in Deer Cave, where the high cave ceilings (more than 100m in some places) provide a safe haven against predators.
- Enjoy the sheer size of this limestone passage, an ancient riverbed, and see the force of water carving the scalloped walls.
- Once you reach the green oasis of the Garden of Eden, you have walked 800m inside Deer Cave. Enjoy the unique showerhead formation of Adam and Eve's showers spouting water columns 30m to the riverbed below.
- Returning almost the same way, with views from different angles, you will visit Lang's Cave with wonderful limestone shawls, stalagmites and stalactites.
- Bats are easier to see in this smaller cave, and you will be very close to the shimmering webs of threadworm larvae, another little wonder of Mulu Caves.
- The tour is timed to coincide with the bat exodus, which could start anytime after 1700hrs.
